

NEWSPAPERS ARE ENGAGING

BUILDING TRUST AND ENGAGEMENT

How do Canadians engage with news and advertising in traditional and digital media given the current climate of fake news and distrust?

News media build trust and engagement by creating and delivering quality content to provide an effective environment for advertising.

The sheer volume of media and advertising messages in multiple formats is overwhelming. Consumers are exposed to thousands of brands/ads daily - less than 100 will create awareness and only about 12 will make an impression and engage consumers.

HOW TO GET NOTICED?

How can advertisers motivate consumers to research their products, take action and ultimately buy their products and services?

ENGAGEMENT

Increasing engagement helps advertising break through the clutter of not only the hundreds of ad exposures per day, but of the thousands of ad and brand exposures per day.

NEWSPAPERS ARE ENGAGING

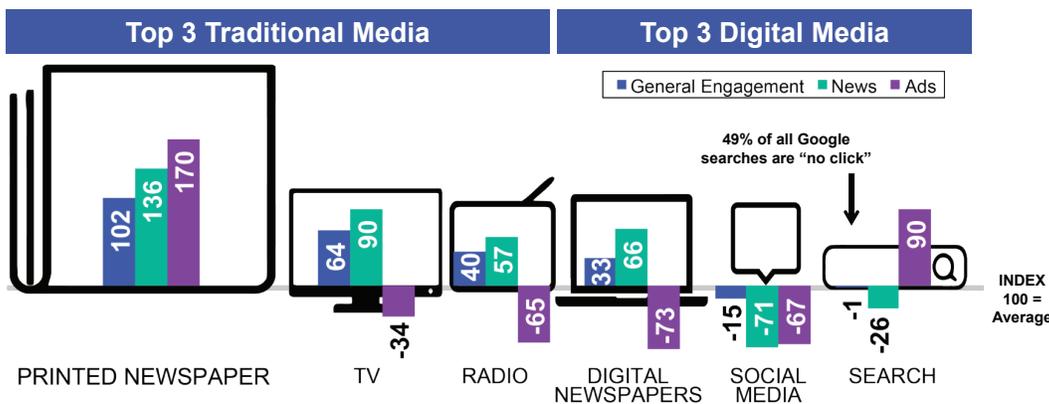

Printed newspapers are the **most engaging** media.

Reading a newspaper requires **full attention**. Consumer attention can be fractured with other media.

Ad engagement for print newspapers is almost 2 times higher than average.*

Canadians want to see the **advertising** in print newspapers; it is expected to be there and is **part of the content**.

Ad blocking software makes it difficult for digital media to engage consumers with advertising despite high levels of general/news engagement.

Canadian adults are engaged with Printed Newspapers on all engagement measures and are almost twice as likely to be engaged by newspaper ads. The only other positive engagement with advertising is with Search ads.
